WHAT DO YOU THINK?

TRUE OR FALSE?

A polar bear cub weighs about 2 pounds when born.

TRUE

They are born very small and helpless. They are toothless, blind, and covered in fur. They grow quickly drinking their mother's milk.

WHAT DO YOU THINK?

TRUE OR FALSE?

Polar bears hiss at each other if they want to share.

FALSE

When a polar bear wants to eat another bear's food, they have a nose-to-nose greeting. The bear approaches slowly and gently touches the feeding bear's nose for permission to share.

WHAT DO YOU THINK?

TRUE OR FALSE?

Polar bears live together in groups.

FALSE

Polar bears are loners, living on their own. Mother polar bears are the only exception as they live with their cubs for 2-3 years.
