## WHAT DO YOU THINK?

### TRUE OR FALSE?

Sharks have fish friends.

**TRUE**

A Remora fish will attach itself to a shark. It also eats all the leftover food from the shark. The shark doesn't seem to mind and allows the remora to do this.

# WHAT DO YOU THINK?

## TRUE OR FALSE?

When a shark loses a tooth  
a new one takes its place

**TRUE**

Sharks have rows and rows of teeth.  
When a shark loses its tooth, a new one  
moves up to fill in the open space. They  
can grow and lose over 20,000 teeth.
