Fun Facts	11
Glossary	12

Animal Group

Hedgehogs are members of the **mammal** group. They are warm-blooded, born alive, have a backbone, and drink their mother's milk. Instead of fur or hair, they are covered in spikey **quills**.

Habitat

Hedgehogs build themselves homes in **burrows** and nests. Their nests are made from leaves, branches and other vegetation. Sometimes, hedgehogs take over **burrows** that other animals have left behind or nestle between rocks.

Habitat

Hedgehogs are found naturally in Europe, Asia, Africa, and New Zealand. They are also found in zoos all over the world. Some people keep them as pets.

Senses

Hedgehogs are **nocturnal**. They stay awake the night and sleep during the day. They have poor vision, but they use other ways to hunt at night. Their long whiskers help a hedgehog feel at night. They can hear high frequency sound helps them find insects and stay safe from predators. They also have a great sense of smell to help them find food underground.

A Hedgehog's Body

Hedgehogs are small animals with a cone-shaped face. They have short legs and bodies. They are covered in **quills**.

Animal Group

They have 5 toes on their front legs and 4 toes on their back legs. They waddle when they walk because they walk on the soles of their feet. They have a small short tail that is rarely seen.

Habitat

Hedgehogs go underneath **hedges** and vegetation to find food. They eat fungi, centipedes, insects, snails, worms, mice, frogs, eggs, birds, frogs, reptiles, and snakes. They **snort** while they...

Habitat

Hedgehog Babies

Hedgehogs give birth once a year. They have 4-7 babies at a time. Baby hedgehogs are called **hoglets** or **pigs**. They live up to 8 years in the wild and to 10 in captivity.

Fun Facts

- ✓ Although not all do, hedgehogs can **hibernate**.
- ✓ They have 5,000-7,000 spikes. If they feel in danger, they will curl up in a ball.
- ✓ There are 17 different kinds of hedgehogs.

Glossary

- burrow**: a hole or tunnel dug
- hedge**: a bush or shrub
- hoglets**: a baby hedgehog
- hibernate**: spend winter in a deep sleep
- mammal**: an animal with fur or hair, born-alive, warm-blooded, and drinks their mother's milk.
- nocturnal**: stay awake at night, sleep during the day
- piglets**: a baby hedgehog
- quills**: hollow, sharp spines on a hedgehog
- snort**: sound through your nose

A Hedgehog's Body What Do They Eat

They have 5 toes on their front legs and 4 toes on their back legs. They waddle when they walk because they walk on the soles of their feet. They have a small short tail that is rarely seen.
