Lion Babies

Lion babies are called cubs. When a baby lion is born, it weighs between 2 and 4 pounds. A lion cub is born blind. Mothers can have 2-3 cubs at a time.

ub

savannah

A Lion's Body

Lions spend between 16 and 20 hours sleeping. They are the laziest of all cats. Lions have powerful legs.

What do they eat?

Lions are carnivores. This means that they eat meat. They can go weeks without water. They hunt at night and work together to find prey.

Predators

Lions do not have predators. They have natural enemies such as hyenas and cheetahs. Hyenas compete with lions for their food and

A Lion's Body

Lions have tan or golden fur to camouflage themselves in the savanna. Male lions have a mane or extra fur around their neck. Female lions do not have a mane.

Adaptations

Lions have night vision. This helps them see their prey at night. They also have a great sense of smell. This allows them to

from a distance.

Animal Group

Lions are members of the mammal group. They are warm-blooded, born alive, have fur, have a backbone, and drink their mother's milk.

Fun Facts

- ✓ Lions live together in group called prides.
- ✓ A pride is usually made up of 15 or more lions.
- ✓ They are the second largest cat in the world. The tiger is the largest.
- ✓ A lion's roar can be heard from 5 miles away.
- ✓ Female lions are the main hunters for their prey.
- ✓ Lions can run up to 50 mph.

LIONS

After hearing the story, draw a picture of something you learned in the box below. Write a short caption explaining what is in your picture.

Habitat

Lions live in large grassy areas called **savannas**. They are primarily found in Africa and Asia. Lions find shade underneath trees.

Lion Babies

Lion babies are called **cubs**. When a baby lion is born, it weighs between 2 and 4 pounds. A lion **cub** is born blind. Mothers can have 2-3 cubs at a time.

What Do They Eat?

Lions are **carnivores**. This means that they eat meat. They can go weeks without water. They hunt at night and work together to find prey.

A Lion's Body

Lions spend between 16 and 20 hours sleeping. They are the laziest of all cats. Lions have powerful legs, teeth, and jaws. This helps them when they are hunting and eating their prey.

A Lion's Body

Lions have tan or golden fur to **camouflage** themselves in the **savanna**. Male lions have a **mane** or extra fur around their neck. Female lions do not have a mane.

Lions live in large grassy areas called savannas. They are primarily found in Africa and Asia. Lions find shade underneath trees.

Predators

Lions do not have **predators**. They have natural enemies such as hyenas and cheetahs. Hyenas come with lions for their food. Lions often try to steal their attacks.

Adaptations

Lions have night vision. This helps them see their prey at night. They also have a great sense of smell. This allows them to smell their prey from a distance.

What Do They Eat?

Lions are **carnivores**. This

Fun Facts

- Lions live together in group called **prides**.
- A **pride** is usually made up of 15 or more lions.
- They are the second largest cat in the world. The tiger is the largest.
- A lion's roar can be heard from 5 miles away.
- Female lions are the main hunters for their prey.
- Lions can run up to 50 mph.
